

## CLAIMS

Claim 6 is cancelled.

Claim 7 is cancelled.

Claim 52 (new): An athletic simulation system having at least one graphical user interface, at least one display, at least one electronic processing unit and at least one selection device, comprising: an electronic data storage component operative to enter players for positions in a squad on an offensive, defensive or special team, wherein each player has vital statistics, general attributes, offensive/defensive attributes and specialized attributes which predict athletic performance; placing each player in a formation; establishing a play based on the formation in which the moving pattern and activity of each player is defined; simulating the play by having each player executing the moving pattern and activity as modified by the vital statistics, general attributes, offensive/defensive attributes and specialized attributes associated with each player, wherein the outcome of the play is based upon the moving patterns and activities as modified by the attributes associated with each player.

Claim 53 (new): An athletic game or sport simulation system having at least one graphical user interface, at least one display, at least one electronic processing unit and at least one selection device and for at least one player on a team participating in said athletic game or sport.
